

County-by County Report: (High Estimate) H1N1 Vaccine Distribution in Ohio for Priority 1 Population

Source: Ohio Department of Health, November 16, 2009

***Note:** Priority 1 Population includes: 1) Pregnant women; 2) People who live with or care for children younger than 6 months of age; 3) Health care and emergency medical services personnel with direct patient contact; 4) Children 6 months through 4 years of age; and 5) Children 5 through 18 years of age who have chronic medical conditions.

Although a county has received vaccine for a certain percentage of its priority population, it does not mean that the priority population actually has received the vaccine; only that the vaccine has been sent to the county.
